

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## Rietz, Crathorne and Taylor's School Algebra

By H. L. RIETZ, Professor and A. R. CRATHORNE, Associate in the University of Illinois, and E. H. TAYLOR, Professor in the Eastern Illinois State Normal School. (*American Mathematical Series.*) *First Course.* xiii+271 pp. 12mo. \$1.00. *Second Course.* x+235 pp. 12mo. 75 cents. *Complete* in one volume, unabridged, \$1.25.

W. A. RICHARDS, *Grant Vocational High School, Cedar Rapids, Iowa*: We have used the *School Algebra* since September, and we have been well pleased with the presentation of the subject.

The thing that particularly pleased me was the fact that factoring—the bugbear to pupils in algebra—is placed after many problems in simple equations. This arrangement shows the pupils that algebra has a practical application before they start the factoring and they, therefore, feel more like working and getting it,

H. E. COBB, *Lewis Institute, Chicago*: It furnishes much excellent material for the work in high school algebra. The methods of presentation are simple, clear and readily grasped. Complicated forms for manipulation and much abstract material of no great practical use are omitted. The problems are new and of considerable interest. The chapter on functions may be made the basis of much profitable work of a practical nature during the course.

THE INDEPENDENT: The *First Course* is admirably fitted to the study of either pure or applied algebra. The transition from arithmetic to algebra is so carefully planned that the student slips over the difficulties without conscious effort, and a clear comprehension of algebra is won by simple drills on puzzling details, by comparisons of English and algebraic expressions and by illustrations with rectangles and circles. By a skillful tabulation of business questions, the principle of graphs is used so constantly that the final plotting of points and lines presents no difficulties.

As a year or two generally intervenes between the use of the *First Course* and the *Second Course*, the latter, following the best features of the first book, starts with a well-planned review. The problems in physics and geometry fully meet the demands of applied algebra, while the work in pure algebra is sufficient to satisfy college requirements.

## Young and Schwartz's Plane Geometry

By J. W. YOUNG, Professor of Mathematics in Dartmouth College, and A. J. SCHWARTZ, Grover Cleveland High School, St. Louis. (*American Mathematical Series.*) x+223 pp. 12mo. 85 cents.

B. F. FINKEL, *Drury College, Springfield, Mo.*:—I wish to say that I am very much pleased with the straightforward and unconventional manner by which the student is introduced to the study of Geometry as presented in Young and Schwartz. The student ought to have no trouble in mastering geometry as presented by these authors.

C. A. EWING, *The Tome School, Port Deposit, Md.*: Its reading gave me a very enjoyable evening. I picked it up to glance through it, but became so interested that I did not put it down until I had given it a careful reading. The introductory chapter is a gem. I know of no other text that makes such a logical approach to the subject. Another feature that delighted me was the careful treatment of the idea of motion. The whole text is built on such original lines that the book itself is an answer to the oft-heard question, Why another geometry?

CHICAGO

# School Science and Mathematics

## A Monthly Journal for all Science and Mathematics Teachers

It is especially Interesting and Helpful to all Mathematics Teachers in Secondary Schools and to all other Instructors in Mathematics who wish to keep in close touch with the latest Thought and Ideas in High School Mathematics.

Mathematics Department Edited by Professor Herbert E. Cobb, Head of Mathematics Department, Lewis Institute, Chicago. Problem Department Edited by Dr. J. O. Hassler, Crane Junior College and High School, Chicago.

## ANALYTIC GEOMETRY

By EDWIN S. CRAWLEY and HENRY B. EVANS]

Professors of Mathematics in the University of Pennsylvania

Size: xiv+239 pages,  $7\frac{1}{4} \times 4\frac{3}{4}$  inches. Price \$1.60.

Chapters I to X (190 pages) give a full college course in plane analytic geometry. Chapter XI (14 pages) on empirical equations will be of particular interest to students of engineering and other applied sciences. Chapter XII, the concluding chapter, is devoted to the extension of coordinate geometry to some space problems.

Orders and applications for sample copies for examination with a view to introduction should be addressed to

E. S. CRAWLEY, University of Pennsylvania, Philadelphia

## Teachers of Mathematics

SHOULD READ

## The Mathematics Teacher

The only journal in America devoted entirely to the interests of the teaching of mathematics. It is helping hundreds of others and will help you.

No teacher of mathematics should be without it and you will not be, if a progressive teacher.

Subscription Price, \$1.00 a year

## THE MATHEMATICS TEACHER

103 Avondale Place

SYRACUSE, NEW YORK

# **THE NEW ERA PRINTING COMPANY**

**LANCASTER, PA.**

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

**Books, Periodicals**

**Technical and Scientific Publications**

**Monographs, Theses, Catalogues**

**Announcements, Reports, etc.**

**All Kinds of Commercial Work**

*(Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.)*

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

**THE NEW ERA PRINTING COMPANY**

# ELEMENTARY PRACTICAL MECHANICS

*Second Edition*

By JOSEPH M. JAMESON, Vice President, Girard College, formerly head of the Department of Physics, School of Science and Technology, Pratt Institute, Brooklyn, N. Y.

*xii+321 pages. 5 x 7 $\frac{1}{4}$ . Cloth, \$1.50 net*

Designed primarily as a text for elementary, technical and manual training schools.

## STRENGTH OF MATERIALS

**A Text Book for Secondary Technical Schools**

*Sixth Edition, Revised and Enlarged*

By MANSFIELD MERRIMAN, Member International Association for Testing Materials.

*169 pages. 5 x 7 $\frac{1}{4}$ . 54 figures. Cloth, \$1.00 net*

Written particularly for students in the higher classes of manual training schools.

## ELEMENTS OF MECHANICS

**40 Lessons for Beginners in Engineering**

By MANSFIELD MERRIMAN, Member International Association for Testing Materials.

*172 pages. 5 x 7 $\frac{1}{4}$ . 142 figures. Cloth, \$1.00 net*

This book requires only a knowledge of plane geometry, elementary algebra, and plane trigonometry to be read with profit and interest.

## STRENGTH OF MATERIALS

**Elementary Study Prepared for the Use of Midshipmen at the United States Naval Academy**

*Second Edition Revised*

By H. E. SMITH, Professor of Mathematics, United States Naval Academy.

*ix+170 pages. 5 x 7 $\frac{1}{4}$ . 73 figures. Cloth, \$1.25 net*
